TUCKER BILL PASSED.

A House Majority Declares For Election Law Repeal.

THE VOTE STOOD 201 TO 100.

Senator Squire Offers an Amendment to the Silver Purchase Repeal Bill-Cockrell and McPherson Speak-Lochron or Pension Department Work.

WASHINGTON, Oct. 11.-The house passed by the overwhelming majority of veas 201, nays 100, the Tucker bill to repeal the federal election laws- The Republicans had intended to refrain from voting on the final passage, but when the Democrats mustered 183 votes on the first amendment proposed they saw that it was absolutely impossible to break a quorum, and yielded as gracefully as might be. The vote was strictly a party one, but the third party men joined with the Democrats. The

house at 2:45 adjourned. Senator Squire (Rep., Wash.) gave notice in the senate of an amendment to the silver purchase repeal bill. It proposes the coinage of silver fr. private owners to the amount of \$2,000,-000 a month not to exceed \$100,000,000 in all-the owners to receive in coin only the commercial value of the bullion on the day of deposit and the difference to be retained by the government as seignorage. It also proposes the issue of five year 4 per cent bonds of the amount of \$200,000,000, the proceeds of which are to be used for the redemption of United States notes. There were two speeches delivered on the repeal bill—the first by Senator Mc-

Pherson (Dem., N. J.) and the second by Senator Cockrell (Dem., Mo.). Mr. McPherson's speech was in support of the bill. He declared it to be his belief (which was shared he thought by two-thirds of the people of the United States who had any opinion on the subject) that the Sherman law was the main cause, the true cause the only visible cause of the business troubles of the country. Mr. Cockrell's speech was in continuation of the one which he began the day before and was directed against the pending bill. He ridiculed the idea of the Sherman law having had any influence in bringing about the financial panic and attributed it rather to the legislation to establish gold monometallism in European countries and in the United States. But as to international bimetallism, that, in his opinion, was an impossibility, a mere dream, as impracticable as a universal language. He spoke for five bours and had not then come to an end

The house bill to repeal the election laws was received during the day. The speaker laid before the house

of his speech.

communication from Secretary Smith, replying to a house resolution requesting information as to the number of invalid pensions granted during the year ending Sept. ! 1893, the number of claims rejected and the number suspended. The information submitted is compiled by Commissioner Lochren and shows that the number of invalid pensions granted during the period was 55,244, of which 9,187 under the general law. The num-ber of claims rejected during this period was 56,702, 48,447 of them being under the act of June, 1890, and 8,359 being under the general law. average monthly award during this period was, under the act of 1890, \$9.43. and under the general law \$7.17. The number of claims of this class suspended during the same time was 13, 371, of which 10.782 were under the ac of 1890 and 1,589 under the general law. These under the general law were suspended during the whole period and these under the act of 1890 were suspended in the months of May

June, July and August, 1893. Holding a Soldiers' Reunion.

WASHINGTON, Pa., Oct. 11.—The re union of the One Hundred and Fortieth regiment, P. V., is in session Veterans are here from all sections of the country, one of them driving through from Kansas with his wife in a buggy. The opera house stage is beautifully decorated and flags banners float to the breeze on all the principal streets.

Hill Presents & Petition.

Washington, Oct. 11.-Senator Hill has presented a huge petition signed by 15,000 New York business men, and not a banker or broker amongst them, asking for the repeal of tre purchase clause of the Sherman act.

Robert Fulton's Daughter Dead.

New York, Oct. 11.—It is nounced that Mrs. Cornelia Livings. . Fultor Crary, daughter of the world-famous inventor of the steamboat, Robert Fulton, died in this city in her 82d year.

Struck by a Train.

JACKSONVILLE, Ills., Oct. 11.-Miss Etta Gunn and Josephine C. Dresser were struck by a Wabash train and Miss Gunn was killed instantly and Miss Dresser was injured so she cannot live.

Shot Herself in the Thigh.

WEST CHESTER, Pa., Oct. 11.-Miss Dougherty, a daughter of Justice S. B. Dougherty of Landenberg, shot her self in the thigh. She was toying with a rusty revolver which she had found in an out-of-the-way place about her home.

Made a State Secretary.

New York, Oct 11. -The American Protective league has announced the appointment of Colonel A. W. Wills of Nashville as state secretary for that

Indictments Against Bankers. KANSAS CITY, Oct. 11.—The Septem-

ber grand jury, which has been investigating the failure of the Kansas City Safe Deposit and Savings bank, has returned 16 indictments against James C. Darragh and 16 against Elmer C. Sattley, the president and cashier of OHIO KNIGHTS TEMPLAR.

Many Attending the Annual Conclave in Session at Columbus

Columbus, O., Oct. 11.—Ohio's capital is attired in her gayest colors. Every business house and many residences are decked out in the colors of the Knights Templar. The annual conclave of the grand commandery of Ohio is in session and the Sir Knights FIVE OFFICIALS UNDER ARREST. and their fair ladies are in possession of the city. The wearers of the white plumes were welcomed at the Board of Trade auditorium by Hon. George J. Karb, mayor of the city of Columbus, and Dr. D. N. Kinsman, on behalf of Mt. Vernon Commandery No. 1 of this The proffered courtesies were accepted by Rt. Eminent Grand Com-

mander M. J. Houck of Dayton, O. The big feature of the conclave was the parade. There were about 1,500 swords in line and the Sir Knights made a most magnificent appearance in their glittering array of costumes. There were 22 commanderies in line and each one was headed by a band.

The Smith Case Coming Up.

CINCINNATI, Oct. 11.-The Ohio synod of the Presbyterian church convened in the Second Presbyterian church and will probably remain in session until Friday evening. The trial on appeal of the heresy case against Professor Henry Preserved Smith will probably occupy two days of the session. There is a movement on foot to pass the case through the synod, without retrial, to the general assembly of 1894, but this project will be strenuously opposed by a considerable party, both of liberals and conservatives. One of the features of the synod will result from friends of Lane seminary to have that institution put on a favor-able footing with the other churches. It will be urged that the seminary, in relieving Professor Smith from duty, has complied with the requirements of the last general assembly, and that the ban placed upon the institution by the assembly should now be nullified. Dr. Taylor of Columbus has been elected moderator.

Arbitrating Labor Differences. COLUMBUS, O., Oct. 11.-The state board of arbitration has returned from Cambridge, where sessions were held considering the differences existing between Mr. Forsythe and his miners. Mr. Forsythe refused to recognize the board, and the question was submitted by the miners. Both sides to the controversy were represented by connsel before the board, and a hot contest was made. The arbitrators have made certain recommendations, which, if not accepted by Mr. Forsythe, will be followed by a full report, giving the facts because of their connection with an ranging from 23 to 33 per cent. ployer and employes.

An Ohio Man Killed.

COLUMBUS, O., Oct. 11.-Information has been received here of the accidental lished basis. shooting at Mingo. Ia., of William West, formerly a well-known Columbus man. years ago he left here and, acmost instant death.

A Girl Disappears.

COLUMBUS, O. Oct. 11.--The disappearance of Miss Eliza Mistlie, a dress maker, who has been boarding with ber cousin, Miss Louise Fahrb k, at No. 818 East Long street, is being investigated by relatives, owing to the mysterious circumstances surrounding the not been seen since. She had considerable and may cause a strike. money and a gold watch, this fact leading to fears for her safety.

A Female Sneak Thick

COLUMBUS, O., Oct. 11.-A female article and undoubtedly came in to work the city during the Masonic conclave, did a clean job at Mrs. Erb boardinghouse, at 108 North Fourth street. She was a nice-looking woman, rather small, of light complexion and ladylike manners and she easily gained access to the house on the pretense of looking for rooms. While in the house she took a \$130 gold watch and other iewelry, in value amounting to several hundred dollars, the property of Miss Anna Laurie.

Drew First Blood

CLEVELAND, Oct. 11.-James B. Mc-Mullen drew the first blood in the celebrated Canadian copper case against Samuel J. Ritchie and others in the United States court. Ritchie's motion to file an amended answer and cross bill was everruled and the case set for hearing on its merits for tomorrow. Some of the most eminent legal talent in the country will participate in the trial and the fight will be long and bitter. The interests involved amount to several million dollars.

He Raised Checks Also.

DAYTON, O., Oct. 11 .- It has developed that the bank check-raiser who successfully worked off an altered check on the Teutonic National bank was an adept also in raising checks. A check drawn by Wolf Brothers of this city for \$20 was increased by the operator to \$70, and paid by the Dayton National bank.

World's Fair Attendance. Chicago, Oct. 11. The paid admis-

mions at the World's fair yesterday were 308,613. Total paid attendance for Oct. 9 and 10, 1,022,259. Indiana Return to School.

CARLISLE, Pa., Oct. 11. The Indian pupils who had been at the World's fair have returned to the Carlisle school.

A Beneficial Society Beaten Out of Nearly \$4,000.

The National Fraternal Union of Cincin nati Worked by Philadelphia People. Other Orders Believed to Have Been Swindled in the Same Manner.

PHILADELPHIA, Oct. 11 .- What appears to be an extensive conspiracy among certain Polish Hebrews in this city to swindle fraternal and beneficial orders has been brought to a climax by the arrest of five officers prominent in the affairs of three local councils of the National Fraternal union of Cincinnati. Other sick benefit societies an l a large number of people are said to be involved and more arrests are looked

men arrested are Moses Parker, Selig Liberman and Samuel J. Blumberg, financial accountants of the three councils, and Drs. Lewis S. Rubinsohn and Abraham Hahn, medical examiners. The arrests, which were made on complaint of Daniel A. Phelps of Cincinnati, su-preme adjuster of the union, are the result of over three months of patient work by Pinkerton detectives and officers of the union. Early in the year three councils of

attempt on the part of the order were established here, their membership being made up entirely of Hebrews. As soon as the 30-day limit had expired applications for sick benefits, in all cases for the limit of \$25 per week, began to roll in. The supreme officers at Cincinnati suspected fraud and began an investigation, finally hiring a Pinkerton man, who came here, connected himself with one of the councils and got himself admitted to the conspiracy, sharing the profits thereof. His evidence against the prisoners is of the most damaging character.

Sick benefit claims must first be approved by the medical examiner and financial accountant of the local council to which the applicant for relief belongs, hence the connection of the five men arrested with the conspiracy. Nearly \$4,000 have been fraudulently collected by the conspirators from the National Fraternal union alone, and it is almost certain that they have swindled other orders of the same character.

ALTOONA, Pa..Oct. 11.—The employee in detail as the board finds them. TWO PERSONS KILLED.

Passengers Have a Narrow Escape in

Wreck. WHITING, Ind., Oct. 11.-Train No. 2 of the Pennsylvania railroad ran into an open switch, causing the engine, mail car and two Pullmans to leave the track. The dead are Henry Warner, engineer, and Henry Christie, fireman.

The accident occurred just west of One Hundred and Nineteenth street crossing. Three persons were injured. including the conductor, but none fatally. The fireman was buried beneath the engine and scalded to death by escaping steam. The train was composed of a mail car and nine restibule cars. It was running but 10 miles an hour. Had it been running at full speed the death list would have been very large. The fire company was at the scene in five minutes and extinguished the rapidly gaining flames. There were more than 400 passengers on the derailed train. The engine and the mail car are both total wrecks.

The Yellow Fever Scourge.

Brunswick, Ga., Oct. 11. -- Surgeon Murray reports three new cases of yellow fever at Jesup, Dr. Samuels. John Gray, and a child, and one discharged. Mrs. Rowland. Seven cases are now under treatment at Jesup. Official reports give deaths: Charles Price and H. R. Duck, New cases: Whites, Wm. Gates, H. Cassell, Elizabeth Lorentzen, A. J. Lisles, Wm. Cummings, Miss Emma Littlefield, Quitman Bailey, Mary J. Gale, H. R. S. Duck, and 25 colored. Nine patients were discharged. Recapitulation: Cases under treatment, 208; discharged, 92; died, 18. Total, 318. Ratio of mortality, 5.6 per cent.

Trying to Recover \$67,000.

WILLIAMSPORT, Pa., Oct. 11,-A bill in equity has been filed here by Charles Bartles, trustee, against the Williamsport and North Branch Railroad company, Edgar A. Taylor, John Satterfield and Henry L. Taylor. The suit is brought in the interest of E. J. Gaynor & Company, late contractors on the railroad, and involves a claim footing ար \$67,000.

A Chicken-Stealing Mania.

JEFFERSONVILLE, Ind., Oct. 11 .-- Geo. Waggoner, aged 65, a well-to-do restaurateur of Louisville, also owner of valuable property in that city, but possessed of an irresistible desire to steal chickens, has been received at the penitentiary to serve two years at hard labor for having robbed a henroast. coroner's investigation of the San Francisco Foundling asylum, where 33 babies have died within the past six weeks. covery. The place has been closed and 241 foundlings given into the custody of the Catholic Infant shelter. The coroner has ascertained that 33 waifs died from lack of nutrition and from inanition and pemphigus. The Daughters of the Good Shepherd

have publicly branded the asylum as a slaughterhouse for babies. The sanitary conditions are very bad. It is charged that the nurses and attendants occupied the sunny rooms upstairs, and kept the babies in damp, dark apartments. Before the coroner it was developed that dead babies were kept on the premises

the attendant but their bodies in a box under the doorsteps and kept them there like so much garbage until he came on Saturday evening on a ten days' to take them away. He had found three ; bodies cast out indiscriminately into the box at one time. He removed them without notifying the people at the asylum.

Iron Works Resuming.

PHIENIXVILLE, Pa., Oct. 11,---The puddle mill of the Phoenix Iron company has resumed operation, giving employment to a large number of hands after a long idleness. The entire plant of this immense establishment, it is believed, will soon be in operation. The plate mill of the Ellis and Lessing Iron and Steel company, at Pottstown, has resumed operations, the employes agreeing after a conference to accept the reduction until the return of better times. The puddlers have not yet decided to accept the proposed reduction in their wages, but it is believed that they will

Tackled the Wrong Man.

LITTLE FALLS, Minn., Oct. 11 .- As Conductor Day's train pulled into the depot a man held a revolver in the face of Brakeman Logan and ordered Logan to throw up his hands. Logan knocked the gun up with one hand and struck the man in the face with his lantern. The gun went off and the night policeman, Ed Guire, rushed up. The man dodged under the cars and opened fire on Guire. The latter got into a ditch and several shots were exchanged. When the firing ceased search made and the man was found with a bullet hole in his abdomen and a 38caliber gun alongside of him.

Hon. Chauncey M. Depew on Cornell University.

A COMMEMORATIVE ADDRESS.

Celebration of the Quarter Centennial of Its Opening-Lessons Taught by the Life of Ezra Cornell-Individuality and Self

The address at the quarter centennial celebration of the opening of Cornell university, Oct. 7, was made by Hon. Channeey

M. Depew, LL. D. He spoke as follows: MR. PRESIDENT AND LADIES AND GEN-TREMEN-This is an American anniversary It celebrates a life which is representative of American conditions and opportunities, and a university founded to meet the practical necessities of American youth. Cornell was the first of the great colleges to but a day with the college revives the enthusiasms and ambitions of the east and puts us in touch with the hopes and aspirations of the present. Patriotic or commecenturies and their divisions which mark ever growing centers of learning are eternal. Levense for and the pritant of the combina-We admire or reverence past events as we tion of the changes, which, either blindin their presence. The fresh and stimulatus. Ideas are companions; facts are mile- telety, but it is in a republic that he becomes sentiments and emotions of this day.

A Useful Career.

The life of Ezra Cornell is a lesson and an inspiration. The study of his struggles good fortune and applauds the management and success is a liberal education. Our meeting would lose much of its significance if it failed to enforce the lesson of the career and commemorate the character of the founder. Sixty-five years ago young Cornell, who had just attained his majority and started out to seek his fortune, after a walk of 40 miles rested upon one of the hills overlooking this beautiful lake. This reticent Quaker was passionately fond of nature, and he was entranced by the made him neither an idler nor a voluptusuperb panorama spread out before him. Few places on earth possess so many scenic attractions. The only one I know which compares with it is the view from the ! Acropolis at Athens, with the plain of Marathon in front, the Pentelic mountains behind and the blue Ægean in the distance.

The young mechanic had neither friends nor acquaintances in the village which nestled at his feet, and his worldly possessions were all in a little bundle on the end of the stick which served for staff and baggage wagon. He had no money and only s spare suit of clothes, but with health, good habits, ambition, industry and a perfect knowledge of what he intended to do and an equal determination to do it, he entered Ithaca a conqueror. No delegation of citizens met him at the gates, no triumphal procession bore him in a chariot, no arches spanned the streets, but the man who was to make this then secluded hamlet known throughout the world had done for Ithaca the greatest service it could receive by deciding to become its citizen. Though poor, he was far removed from poverty. His sitnation illustrates one of the hopeful features of American conditions. Neither doubt nor despair was in his mind. He had found his place and knew he could improve it. He saw his ladder and began to climb. It is the genius of our people to get on, and it is the pleasure of the community to belp and applaud. Occasional failures test the metal of the aspirant, and hard knocks develop grit or gelatin. There are, unhappily, suffering and hopelessness and helplessness incident to the practical workings of the doctrine of the survival of the fittest, but vigor and manhood win

Faith and works were the principles of Ezra Cornell and the carpenter's beach a platform and preparation for larger efforts, Adaptability and concentration of effort They have opened mines in the mountains and transformed the prairies from wild wastes to fields rich with golden grain and dotted with happy homes. They have suggested the inventions to meet the necessities of the hour. They are American characteristics. They belong only to a people not taught to plant their feet only in the ambitions for an institution of learning of time by the steps of their ancestors. With Mr. Cornell these qualities were superlative gifts. As a carpenter he improved the methods of his village master; as a benefits to the commonwealth from the mechanic he devised machines which overcame unexpected difficulties; as an unprejudiced practical man he became familiar with the uses of electricity while the professor was still lecturing upon its daugers.

Morse had discovered the telegraph, and if he had lived in an earlier age he would have been either incarcerated or incinerated. Bigots looked with suspicion upon this possibly sacrilegious trifling with the lightning, scientists doubted the utility of this celebration that the si west New York the invention and congressmen regarded it exacted from Ham Cornellocations at tore d with distrust. The inventor needed an un-tribute for the privilege of going \$500,000 daunted and indomitable man of affairs to of elsown money for the permanent hencefit demonstrate to capitalists its possibilities of her people. and to the public its beneficence, and he found him in Ezra Cornell, who saw its ket by the several states of these lands had future, and upon his judgment staked the reduced their price so low that has a fracaccumulations of his life and the almost ition of the sum intended was realized superhuman labors of a decade. He owned Then the same business sagacity, foresight electric shares of the face value of millions, and indomit the coverage which had carried and went hungry to bed because he had not | the telegraph to success again came to the the means to pay for a meal, and his family suffered because they could not be trusted for a barrel of flour. But neither want nor all the burdens of maintenance and taxa debt nor the sheriff could wrest from him his telegraph stock. I know of no more, surate with the purposes for which they dramatic scene in the lives of any of our many successful men than the spectacle of fortune, increased his cares and brought this potential millionaire transport through a poor him a storm of criticism and stander. the highways and byways of penury, suffer. , but the strength and grandeur of this great ing and sickness, upheld by his sublime and growing university are the living faith in his work and the certainty of its monuments which vindicate his name and recognition. Suddenly the darkness was dispelled and the day dawned. People woke up to the necessity of the telegraph for the government and for commerce, and

Responsibility of Wealth. In a country like ours, where so many accumulate great wealth, its proper use and distribution are becoming questions of national as well as individual interest. A half century ago the subject was unknown; a quarter of a century ago the public thought little and cared less about it; but today it threatens to become the incentive to or the solvent of socialism. The concentration of have advanced with equal pace. The recent political movements, which in some states defeated both the national parties, were

Cornell's faith had coined for him afortune.

the expression at the polls of the silent was a wonder and inspiration to listen to forces whose growth and strength had been unnoticed. Though the principles of the new faith are vague, incoherent and apparently absurd, the underlying power which welds and wields them is hatred and distrust of property. The objective point is at present the cor-

poration. But as the operation and necessity of this device for transacting a business in which all as stockholders can participate is better understood, the million aire becomes the target. It is at once the anomaly and the danger of the crusade, that it enlists those who are themselves contribute a chaplet to the wreachs which property holders, as farmers or house owners or tradesmen, against those who have more. Selfish and ostentations wealth is the most potent agency for promoting the tiethods for its own diminution and destruction by legislation, while the wise and generous use of money builds barriers for

The most arrogant and offensive manager of money is often the man who has endured and suffered adversity and finally becomes a success. He proudly boasts, "I owe nothing to the world," and "No one ever did anything for me." He is neither sympathetic with the struggling nor sensitive to duty. As a money making machine cultivate a field outside the lessons and he incurs the enmity of his fellows and traditions of the media vel school men. The cares nothing for their good will. With an most exquisite of pleasures is contact with | increasing contempt for those who fail to get the perennial youth of our alma mater, on in business comes a growing disparage-Parties dissolve, friends grow cold, loved ment of the value of the work or services of ones depart, and age becomes a solitude, others. He pays grudgingly, and gives regretfully only under the resistless pressure of his surroundings. In the lending of money be practices the arts of the usurer, and in speculation those of the gambler. The world morntive celebrations are ephemeral. The gains nothing by his life, and his heirs are his only beneficiaries at his death. Such a the recurring natal days of these great and I man does introite harm. He is at once the do statues or monuments, only when we are ly or viciously, labor for the destruction of our institutions and laws. He has existing influences of college life are ever with led under all forms of government and sostones. Head and heart are united in the peculiarly obnoxious, and the methods of teaching him seem more accessible.

There are men who so use their wealth

that the whole community rejoices in their of their trusts. Their course sharply differentiates between property and its administration. They draw the fire from vested interests, upon whose integrity and safety the structure of society depends, and concentrate it upon the unworthy steward who defies the written laws of God and the unwritten ones of men. A most noble and brilliant representative of this class was the founder of this university. Prosperity ary. It added fresh vigor to his work, enlarged his vision and broadened his sympathies. There were no neawkish sentimentality nor theatrical surprises in his character. He determined to devote a portion of his fortune to the welfare of his countrymen land country women and decided that the best way was to give them the education and training with which to help themselves. He had the self-made man's belief that a successful career is possible to every one who tries, but he knew from sore experience how much more difficult is progress for the poorly equipped in the sharp competitions of life. He did not give up money making. On the contrary, the more beneficent purposes to which he found it could be applied the harder he worked to gain more. His was the ideal of the divine injunction to be "diligent in business, serv-

In great crises in the history of nations and in the conjunction of events which produce revolutions in the moral, the mental or the physical conditions of a people. God always provides the man for the The causes which produce him and the results which follow his actions may form an epoch in the development of the race or only contribute to characteristics which mark a century. A Casar, a Hannibal, a Napoleon, a Peter the Hermit, a Luther, are cras in the story of the world. The generations which five in the period of the activities of such phenom enal genius are either consumed by the burning heat of the sun or blinded by its radiance. Centuries must clapse before we can calculy contemplate the or achievements, forgetting the trightful sufferings and calamities through which their work assumed form and permanence.

Mr. Cornell's Wise Forethought,

it is our happier lot to celebrate one of those minor events which is not a revoluhave developed the resources of the country. tron, but an evolution. The government of the United States suddenly discovered that it had a duty to perform toward the education of the people. The federal constitution made it necessary to act through the states. Congress gave for this purpose a large grant of land, and nearly a million of acres came to New York, Schools who are not trained in grooves and are struggling in immedial difficulties, localities deeply worn molds made in the pathway and speculators seeking the possession of the prize threatened the confiscation or dissipation of the trust. The friends of high-reducation, who had hoped for great wise administration of this fund, were in despair. The wisdom and generosity of Mr. Cornell saved the honor of the state and rescued the national gift for education. He said: "Concentrate this endowment. which is the only way to get its benefits, and I will add a half mellion dollars to it. from my own fortune " li is a semiñeant. commentary upon the 12 norance and greed of the times and the progress indicated by

> public service. The founder contracted with the state to carry these lands and hear tion until their value should be commenwere dedicated. The trust impaired his

The figures and results marvelously demonstrate the wisdom and sagacity of Ezra Cornell. The land grant to all the states was 9,597,840 acres, of which New York's alone was 980,920 acres. The whole grant. realized the sum of \$15,866,374, of which New York's part brought \$6,661,473, or nearly one-half the money for one-tenth of the land. Truly in this, as among the many events which have made New York the Empire State of the Union, when the clock brate.

struck the hour the man among her people

who was equal to the occasion answered,

"Willing and ready." It was my privilege as a young man and riches and the cultivation of agrarianism the youngest member of the legislature to ait beside Ezra Cornell. I learned to love and revers him. In those days, so full of the strife and passions of the civil war, it

the peaceful plans of this practical philanthropist for the benefit of his fellow men. The times were big with gigantic schemes for the acquisition of sudden fortunes, and his colleagues could not understand this most cornest and unselfish worker. To most of them he was a schemer whose purposes they could not fathom, and to the rest of us he seemed a dreamer whose visions would never materialize. These doubters of a quarter of a century ago esteem it a high privilege to stand in this presence and an honor to have the opportunity to crown the statue of Ezra Cornell I remember that a scheme had been per-

feeted whose ramifications extended all over the state and embraced the strongest men of both parties to raid the treasury upon a false assumption of the needs of the canals. The measure was sprung suddenly upon the house, and as chairman of the committee of ways and means it was my duty to fight it. I was almost wholly unprepared for the task. When the enemy seemed about to triumph, Mr. Cornell opened his desk, took from it a carefully arranged mass of figures and statistics and placed them before me. "I have been gathering these for several weeks," he said, "in order to make a speech against this bill but you need them now." They gave such full and complete refutations of the claims of the combination that at the close of the debate the proposed act was defeated and its advocates so completely routed that it was never revived. He cared more for the triumph of the truth than for any tame he might gain as its advocate. It was this utter oblivion to self which led him to sacrifice everything for this university when once he had become convinced of its necessity and laid its foun

Object of Higher Education.

It was the highest public spirit which moved him to contribute a half million of dollars to concentrate and preserve the contice and enjoyment of their several pur gressional land grant. It was the nobility suits. which rises above natural and justifiable indignation that made him submit to the toll of \$25,000 for the privilege of grandly giving of his own. It was the spirit of which martyrs are made that inspired him to carry the land grant through years of financial depression, periling his fortune and impairing his health with the burden until finally the trust which would have brought only thousands realized millions. It was the martyr, to the purest and loftiest sense of duty to his country and mankind, who buried the larger part of his estate building the railroads which connected his university with the transportation facilities of the country. But he secured for the people a sent of fearning which will be ever increasing in strength and beneficence, and for himself the gratitude of all succeeding

generations and immortal fame. Textbooks and lectures are only part of an education. There is more growth without than within the classroom. The faculty may be ever so taithful and learned-there is still much beyond them. The spirit of a college indelibly impresses its students. With the century old foundations, it is the treasured memories and traditions of a brilliant past. It is the force of the accumulated achievement., and examples of generations of alumni who have illustrated and illumined the progress and glory of the republic. It matters little to Yale or Harvard that their founders are scarcely more that names with which nothing tangible can be connected. It is much -it is everything to young Cornell that her sons can

be inspired by such a founder. The main object of higher education through all the ages had been to prepare men for the next world. It had not been thought necessary to do much for women, either for earth or heaven. The Puritans started the college with the settlement, but it was to train young men for the Christian ministry. We have not yet entirely recovered from the belief that a university career is worse than useless, except for the pulpit, law and medicine. But the founder of this institution profoundly believed that the better fitted a man was for his lifework, the better his preparation for an ex- cultivated the best traits and most chivistence beyond the grave. A successful alric characteristics of American manworker, in a nation of workers, cared noth-bood. Their audition and success have ing for speculative philosophies, but had unbounded tath in the possibilities of an educated farmer or mechanic

The materialism of our time is frequentty denounced and eloquently assailed. It crushing slavery of a few overcrowded and is in a sense the protest of the present against the past; of the practical progressists against the musty school men. It gives our people more and better homes. Its inventions add immeasurably to the comfort. and happiness of our lives. Its enterprise and energy develop our resources and in crease out national wealth. Gross materi alism, which sacrifices everything to the mere accumulation of money merits the censure it receives, but the real benefactors of the world mourage of bard structes and hot competition are those who do most to fit both heads and hands for the needs of the hour. Whatever blessings have belonged in the past to him who made two blades of grass to grow where only one did before, are equally carned by the man whose locomotive or electrical device or machine or engine have multiplied nower and samplified labor. Every scientific or mining or technological or manual training school is the outgrowth of and contribut ion to our higher materialism. The new learning is not an assault upon but an enlargement of the old. The splendid results of ancient methods keep firm their hold upon the colleges. The training they give is equally beneficial for business and the professions.

It is the liberal education for ordinary pursuits which this university has demonstrated to be one of the great aims of teaching "I would found an institution where any person can find instruction in any study, was the motto of the founder. It embraces in its catholic hospitality both sexes and all conditions in life. It is a trite truism that intelligence and virtue are the safety of a republic. For our period intelligence requires a broader interpretation. The ordinary equipment of the school is not sufficient now, though it might have been with our tathers. It must be supplemented by both practical and scientific training for one's chosen vocation.

The rule of the thumb was the orthodox faith of the past and is the transparent weakness for the present. Greek and Latin will continue to occupy leading places in a liberal education. These languages may be dead as spoken tongues, but they embalm the priceless treasures of the past which have more than once rescued learning from the darkness and led the minst of the age to the light. It is not every one who has the time, the disposition or the ability to master the classic curriculum and its attendant requirements. There was no place for them within a period so recent that it hardly antidates the day we cole

The New Education.

The academy of Plato flourished at Athens for 900 years. It preserved and stinuslated the intellectual life of the civilized world through all those centuries. Justinian prepared the way for the dark ages by closing this venerable seat of learning and confiscating its endowments. But la

practical education perished with the claspolice duty. Educate, educate, educate, is sicul teaching which he thought useless. the national necessity. It takes time for In this university Plato's academy and emigran': coming to our shores to fully the new education can dwell harmoniously absorb the principles of American liberty. and work beneficently on the same campus, but their children can be so firmly ground-The student has his choice between higher ed in its truths in the schools that they education for mental discipline and intelwill be the best and bravest citizens of the lectual strength and pleasure, and higher state.

The grand mission of institutions like

education specifically for his vocation. His

diploma informs the world precisely what

would have paralyzed Duns Scotus, amazed

Erasmus and shocked Abelard. They

would have felt that they had touched the

base earth and its ignoble occupants. But

we could not live in the clouds of the mid-

dle ages. With us the earth is the Lord's,

and its dwellers his children, with equal

rights and share in its blessings and oppor-

This experiment was hailed with derision

and distrust. It has been settled by Plato's

academy, and never after doubted, that re-

pose and retirement from the activities of

life were essential to study and thought.

The venerable grove and the moss covered

and ivy crowned hall were the symbols of

learning. "The roar of the steam engine,

the shrick of its whistle, the clatter of ma-

chinery, the fascination of the electric mo-

books and reflection upon lectures." The

issue was confidently met and courageously

fought. We are here to celebrate the suc-

cess of the idea of which Cornell is the

chief exponent. From the chairs of the

faculty of many colleges, from the bench,

the bar, the pulpit, the doctor's office and

the editorial sanctum; from the field, the

farm and the factory; from the counting

room, the telegraph and the railway, the

alvabiof Cornell university are gathered

to () loving and reverent honor to the gifts

which have lifted them into both the mac-

Sir William Hamilton declared that

"none of our intellectual studies tend to

cultivate .. smaller number of the faculties

in a more partial and feeble manner than

mathematics." Dr. Whewell writes that

"mere classical reading is a narrow and en-

feebling education," while Herbert Spencer

solves in his large way the whole problem

of study by his compact statement that

"to suppose that deciding whether a math-

ematical or a classical education is the best

in deciding what is the proper curriculum,

is much the same thing as to suppose that

the whole of dicteties lies in ascertaining

whether or not bread is more nutritive than

potators." The wise liver finds food in the

life and products of the land, the water and

the air, and selects that which nourishes

him best. And so classics and mathematics,

history, literature and philosophy, physics,

botany, zoology, physiology and the struc-

ture of the mind, politics, economics and

ual training, are the component parts of

the equipment which the new learning of-

ers to the student for his choice and needs.

The variety and excellence of the world,

the multiplication and beneficence of its

activities, are due to the fact that what is

meat for one man is poison for his neigh-

hind us has no greater distinction than the

advance in the education of woman. The

doubts which surrounded the movement

have been dispelled by the splendid dem-

onstration of her ability to successfully

compete with her brothers in any and every

field of intellectual study and research. It

is now urged that, when returning home.

she is so much better educated than the

village swain, she either rejects him and

fails in her mission, or, as his wife, de-

spises him. Ignorance is no excuse for

keeping others ignorant. The alumna of

our female colleges will see to it that their

boys are educated, and they are more and

more every year the most active and effect-

opportunities for study. Their co-educa-

tion at Cornell with the young men has

stimulated every department of the uni-

versity to more carnest effort and higher

The emancipation of woman from the

wretchedly tenumerated industries has in-

creased incalculably both the sum of hu-

Educational Progress

two inventions. Franklin's lightning rod

ress, has redeemed and regenerated the

globe. These marvels have changed the

relations of men to each other and revolu-

tionized their standing with the state,

They have proved hotbeds of democracy

and encouraged despotism. The pace has

been too rapid for humanity to adjust it

self to the new conditions. Both society

and the commonwealth require educated

intelligence for their safety. The fathers

built their republic upon the individual.

His independence was the keystone of the

arch which supported their institutions.

The mighty forces which the inventions

have made obedient to the service of man

have so increased productive power and en-

ergy that we live in an era of great com-

Organization threatens the destruction of

the individual. The corporation or the

trust says he shall not do business except

as their employee or by merging his plant

in theirs, and the labor union says he shall

not work unless he does so by its rules

and with its permission. Aggregated capi-

tal united to build up and carry on im-

portant enterprises causes labor to create

counter forces for protection. The one

attacks the small producer or manufac-

turer and drives him out of business, and

the other prohibits the artisan from indi-

vidually accepting employment, no matter

what his skill, his desire or necessities. The

same concentration of power has invaded

the sphere of politics. Our cities are gov-

running into the same conditions.

better for ber independence.

ideals.

ive workers for greater facilities and freer

The marvelous quarter of a century be-

science, intellectual development and man-

tunities. All work in it or on it is noble.

Cornell is the training and graduating of his alma mater has given. A review of the men of independent thought and action. courses prescribed and permitted here The self reliance which comes from the con scious mastery of one's calling is independence, and when supplemented by the teachings and touch of the university it is liberty. Every youth who goes out into the world from any department of this college becomes in the community where he settles an influence for right thinking and right acting. He is a standard for better work in his vocation. One of the difficulties of our situation is the mass of half educated and badly trained young men who come every year from our schools. Their equipment is too superficial for the professions or for business, and they have no preparation for the trades. They emphasize by their necessities and their careers the call for every possible extension of the new learning. It is both a commentary upon the public necessity for education and a tors, the handiwork of the architect, the comfort for the future that there can be engineer, the surveyor, the farmer, the artifound in the ranks of socialism or anarchy san, upon the campus will destroy," said the in the United States scarcely a single grad teachers, "all concentration upon textnate of any high school-classical, tech

nological or manual training. Cornell gives free education to nearly 600 students, the representatives of the assembly districts of the state of New York In doing this she fulfills in fourfold measure the spirit and letter of her founds tion. But the Empire State should not permit its sons to be a drain upon resources which have been so wisely husbanded and so admirably administered. It should generously recognize the splendid work done at Cornell and appropriate the means for the tuition of those who are here and those who wish to come. Then there would grow up on the shores of Cayuga lake a student republic rivaling those which greeted the middle age revival of learning and justinet with the life and energy and aspirations of today. The picture and the prospect should thrill the people of

New York with loval pride. A few years ago the University of Heidel* berg celebrated its five hundredth anniversary. The heir to the throne of the German empire presided. Princes responded to the sentiments, and around the great hall bung the banners and armorial devices of the hereditary rulers of the land. The spectacle was brilliant and imposing, and the daz-zling display of the emblens of rank and power made it a memorable pageant. When your eyes had become accustomed to the sheen of the armor and weapons and jewels and your ears to the blare of the trumpets. you instinctively queried. What lesson of these five centuries does this ceremonial You saw the baron in his castle on the Rhine, with his vassals at his feet; you felt the power and glory of Teutonic valor and achievements; you knew of the scholar and learned men who had passed the portal: of the university, but you felt that the political, the social and the material conditions of the age of invention and democ

racy were not represented.

It is the proud boast of Cornell that she is not only abreast with the times, but is leading them. No traditions retard her growth, and no legends obscure for her the truth. She feels the movement of the intellectual activities of the country and the throbbing pulse of our industrial develop ment. Her 25 years are coincident with the unparalleled progress of the United States since the close of the civil war, and her wonderful growth has been stimulated by

Said Mr. Gladstone to me: "If I had to select from all the half centuries of record ed time the 50 years in which to pass my active life, I would choose the 50 years in which I have worked. It has been 50 years of emancipation." What is true of this most remarkable and potential statesman is still more applicable to this university. Her quarter of a century is the high water mark of intellectual activity, scientific discovery, realization of liberty and material Hero worship is the happiness and inspiration of youth, and we have for this period Lincoln and Grant and Sherman and Sheridan in statesmanship and arms in our own country, and Gladstone, Bismarck, Von Moltke, Thiers, Cayour and Gambetta abroad. Literature has been en-riched by Ruskin and Hawthorne, Taine and Emerson, Longiellow and Tennyson, Banero't and Green, Whittier, Lowell and Holmes. Scholars and scientists, too nu-merous for record in the limits of this address, have irradiated this era with the re-

sults of their genius. A Glorious Future.

man happiness and the well being of our Edison and Bell and others have demoncommunities. Education has fitted her for strated the limitless possibilities of elec-tricity. The spirit or invention and discov-ery has broken down the doors which safe fields which needed her labor, and the world is enriched by her skill and fidelity, and the guarded the secrets of nature and let loose the imprisoned forces of resistless energy and remorseless power and tamed and trained them to the service of man. The The eighteenth century produced only emancipation of the slave and the reconstruction of the states, the education of the and a machine for the manufacture of freedmen and the restoration of national nails. The nineteenth, with the telegraph freedmen and the resonant are our ob-unity and national patriotism, are our ob-tect lessons in philanthropy and stateand telephone, the sewing machine and the cotton gin, the railway and the steamship, craft of priceless value to this and coming and the thousands of other motors of prog-

generations. In the heroic age its honors and renown were for those who had been most success ful in killing their fellow human beings In our prosaic one, they are reserved for those who do most and best to preserve the lives, improve the health, increase the happiness and promote the welfare of the men and women of the present and the future. Philanthropy has by natural evolution grown from an impulse to a science. The indiscriminate giving which pauperized has become the wise endowment for restoration to independence or the training for leader-hip. Our benefactions assume two forms, the one for repairs and the other for construction. In the first are hospitals, homes and asylums, and in the second the school, the college, the nni-versity and the library. Money yields its most satisfactory return when it is spent to open and smooth the pathways of youth to opportunity and careers. The investment compounds, and in compound-ing reduplicates its beneficence with each generation of students, while the benefactor has ins fame freshened and enlarged by ev

ery recurring class till the end of time.

The enduring monuments of those who have promoted the growth of Cornell are fast filling the campus. They are the buildings devoted to liberal learning which they have They are the buildings erected or furnished and endowed. Next to the name of the founder comes the benefactor Henry W. Sage, and then that noble, far-sighted and unseifish woman whose eyes closed in death in the helief that she had done all she could for the university which she loved. Boardman and Barnes and White and Sibley head the roll of honor, which will increase with the annual celebrations of the founder's day.
"I would found an institution where any

erned by one or more powerful leaders, who, without the responsibilities of office, person can find instruction in any study" is the chart, the compass and the beacon command the unquestioning obedience of the officeholders, and our states are rapidly light for Cornell. It shows all the oceans and continents of knowledge, it points the In 1862 Abraham Lincoln had upon his course of safety, according as the student would sail close to shore or fearlessly vendesk the emancipation proclamation and the land grant bill to promote education. He signed them both. The one was an esture upon the boundless deep, and it warms him to keep and permits him to remain within the lines for which he has the abil sential complement of the other. Without ity, taste and time. It is a motto under education, emancipation does not emanciwhich the sons of the laborer and the milpate. The freedman exchanges one thralllionaire, of the lawyer and the merchant, of the farmer and the mechanic, meet for dom for another. The tendencies of our times are much plainer than the remedies. the enjoyment of its equal gifts and oppor-It is utterly inconsistent with the welfare funities. Cornell rounds her first operter century with a record of growth, maturity and power unequaled in the history of corof our people that conflicts between capital and labor should always end in the primileges. Superb as is her youth, it is still only the promise of the splendors of her tive barbansa of a condition of war, with either the citizen soldiers under arms or maturity and the riponed and softened semimilitary private organizations doing grandeur of her age.

FOR LITTLE FOLKS.

Alice and Her Cubs.

Alice is the big yellow lioness in the park menagerie. She is as big as the biggest lion you ever saw in Barnum's show and very fierce.

This spring Alice had three of the cunningest little lion cubs you ever saw. They were 10 inches long-about as long as a loaf of homemade bread—and as yellow as gold. They had hair very long and very silky, and their pink noses peeped out from under a pair of eyes as yellow as amber beads.

One day Alice was very naughtynaughtier than anything you could imagine if you were to guess ever so long. It was the naughtiest day of her life. And what do you think she did?

Early in the morning, before her keepers were up, this naughty Alice killed one of her cub babies by biting its head off. And before the keepers found her she had eaten it all up and was getting ready to eat the second one. The third cub was way over in a corner of the cage crying as loudly as it could. For fear Alice would eat this one, too, the little baby lion was taken out of the cage and was given to a nice, friendly dog. who took a fancy to it right away and treated it like one of her own family.

Alice was not put to death for killing her babies in this cruel way. But do you not think that something should have been done to show her that this was not a Constian way to treat her Lttle ones:-New York Ledger.

A Blind Beggar's Faithful Dog.

A very curious story of a canine musical ear is told of a London organ grinder's dog. The organ grinder was blind and aged, and the dog used to lead him about. One night, after a hard day's work, the old man and his faithful companion lay down to sleep with the organ beside them. They slept soundly, and when they woke the organ was gone.

They were in despair. Their means of earning a living was gone. But the dog led the old man through the screets where he had been accustomed to play, and persons who had given him alms before continued to befriend him.

Weeks went by. One day the old man heard a hand organ played a few feet from him. It reminded him of his lost instrument, but he paid no special attention to it. Hand organs were common

in London, and he heard them often. Not so the dog. He showed signs of excitement, barked violently and led his master in the direction of the organ.

He sprang at the robber's throat, dragged him away from the stolen organ and led his master eagerly up to it with expressions of recognition and delight.—Youth's Companion.

A CONTINUATION OF THEIR EXPER-IENCES AT THE FAIR.

Mrs. Rently Tells What Strange Things speakable Turk.

wheel, we mingle with the throng on checks for them. the Plaisance, and find our way to the streets of Constantinople. The manner in which the foreigners acquire class in U.S. history was very interour language is interesting, and yet esting. crous manner. A young Turk was exhibiting some very beautiful mate of finely wrought linen and gold threads. We admired them very much, but the prices, of course, like everything else at the Fair, were exhorbitant.

"Yes," said the Turk, referring to two mats before him, "dis one is peautiful, but dis one is exclusive." Of course we smiled, and he hastened to ask whether ne had used the wrong word, repeating "ex ex-ex?" Exquisite," we told him, and with some prac- the Ferris wheel and the glittering tice he coud pronounce the word, dome of the Administration building, One of the "lone women," however, wanted a mat very much, but had and as he departs, farewell. squandered too mush money in the early part of the day, so found her funds low when it came to buying the "exclusive" mat. She regretfully told the Turk that she would call for it the next day, that she had not enough with her to buy it then. A Furk knows the A Fine \$350 Plane to be Presented to the difference between a bird in the hand and a bird in the bush, as well as any one else, and he suggested that she "iend some money from her friends and buy it now." Of course we take the mat. The gold threads glistened beautifully just then, and we

The glass dress at the Libby glass decollette and short sleeved, trimmed woven glass. The skirt is cut with many gores, the seams covered with a fancy braid of glass, and the front of the skirt is trimmed to correspond with effect is rather stiff and ungraceful and they say that the ends of the threads, as in the fringe, are very sharp. The gown is no longer on exhibition; it has gone to add to the Princess Eulalia's sufferings. The noise and din of the Plaisance

weary us Bag pipes, those senseless noise makers, shriek at u from Blar ney Castle. The "Hot, Hot, Hot, cry follows us everywhere. A camel covered with bells runs by, the "music" from the Aztec show rattles out upon the air, and in despair we look for an escape from the nidway Plais-We see one and soon the din is behind us, the sound of the bagpipes grows fainter and fainter, the rabble is back in the distance, the sense of oppression and fatigue gradually leave us as the distance between us and the Plaisance increases, and soon we breathe a more refined atmosphere; we

As we strayed along the shores of Lake Michigan on our way from the Liberal Arts building to the Cliff made so that the school teachers, their member of last year's team. Otherwise Dwellers, we stopped to look at the pupils and friends may be pregared to waves rolling in. With our sunshade handles we wrote upon the sands in large letters, for we were proud of it, THE INDEPENDENT wants every "Chio:" two waves touched it, the third wave washed it out, but it was only the written name-Onio will always stand

The Cliff D sellers prove a very interesting feature of the great show. The structure in which this exhibit is shown represents a canyon, on a scale of one tenth of the natural size, of the mountainous district in which these discoveries were made. The homes of this prehistoric race are built high up in the perpendicular cliff, and the mystory is, how did they get to and from their dwellings? Only one short ladder has been found by explorers, which would be of no consequence at all in climbing the cliffs, and no staircases have been discovered.

Their skulls show that in infancy their heads were flattened at the back by means of boards, and there was among the locks of hair, in the museum, not a single black tress, all shading from yellow to light brown. Their exhibit includes well preserved mum mies, bones and skulls. Vattings and fabrics woven by the Cliff Dwellers, as well as cooking vessels and pottery, and many other strange and useful devices fashioned by the people who lived in our country ages ago, give evidence of their skill and intelligence, and one wonders whether Christopher Columbus did really discover America or whether these people found it first, but have left no evidence, no one being able to translate their hieroglyphics. Perhaps all of the glory of the discovery of America is being heaped upon the wrong man.

Two of our party climbed the mountain trail which brought them to the top of the Oliff Dwellers' structure; the other two stayed within and fed sweets to the pet burro Expo, who is a great favorite with the visitors. As we left the cliff Dweilers' museum, we stole glances over our shoulders at the mummies, wondering, as we did so, whether we would dream of the horrid brown things that night.

The monastery, La Rabida, is full of interest to us. It seemed that Oatholic people took great pride in it, and well they may. The crowd was so great that we could only get snap shot! glances at the ancient pictures and doc-

worth.

Caylor Writes About the Champion Boston Baseball Club.

VICTORIOUS FOR THREE YEARS.

Interesting Gossip About the Greatest Aggregation of Ball Players In the World. Teams That Have Captured the Coveted Penpant in Years Gone By.

For the third time in succession the Bostons have won the League pennant. For the sixth time, too, out of the 18 years of the National league's existence the Boston club has captured the championship. These six victories occurred in 1877, 1878, 1883, 1891,

1892 and 1893. The Chicagos are an equal the pennant in 1876-the first year of the League-1880, 1881, 1882, 1885 and 1886. It. has been seven years since Uncle Adrianapolis has tasted the sweets of final victory, though on several occasions the cun was held to his lips, but dashed to earth just as he inhaled the intoxicating aroma. Seven years was the period allotted to Jacob to serve for Rachael. Anson knows therefore how hard it was for Jacob to wait all that time for his bride. But let us hope that "Anse" will not have to serve yet another seven years for his reward, as Jacob did.

I saw Captain Angon last week, just after his reorganized Colts had won three sucsincerity of a World's fair fakir that his team, as now organized, was entirely satisfactory to him, and that with it he ought next year to win the League championship, Of course he expects Ryan to be well again in 1894, and that will make his outfield consist of Ryan, Lynch and Wilmot; his infield, Decker, Irwin, Dablen and Campe; his pitchers, Clausen, McGill, Abbey and Hutchison, and his catchers, Lange, Kittridge and Schriver. The team, as thus constituted and as it is now playing ball, should surely make a bid-for a place-high up in the lists. My impression is that Decker will be a fixture at first, and that in spite of all the old man's bluff he has

played his last season of regular ball. But to return to my first subject. Out of the 18 championships of the National league Boston and Chicago have claimed 12 in equal division. The other six have been won by the New York, Providence. Detroit and Brooklyn teams. New York made successive "wins" in 1888 and 1889. The Brooklyns took the flag in 1890, Detroit in 1887 and Providence in 1879 and 1884.

The present Bo-ton team has practically been playing its second season with almost unbroken ranks. Quinn is the missing the composition of this season's champion team is what it was last year, with Merritt and Gastright added to the battery department. A brief sketch of the members o the team will not be unanteresting in thi connection.

Nichols has been the club's star nitcher. He won the nickname of "Kid" while in the Western league, where his youth, cou pled with his great success, earned for him that title. When Selectame to Boston to manage the team, he brought Nichols along, and the latter has been the Boston's winning pitcher ever since. He is strictly temperate, takes good care of his physical powers and always has his club's interest

deeply at beart. Stivetts also went to Boston from the west. He is one of Comiskey's pupils and made his first great reputation as a member of the St. Louis Browns. He is a young man of fine physique and shared with Rusie the honor until this season of being one of the swiftest pitchers in the country. He has not been so effective this season as last and was one of the four players who recently appeared on the ground at Cincinhati in a state of intoxication. There is no doubt that Stivetts' indulgence in liquor has lessened his effectiveness this season.

Staley, the third of Boston's last season's trio of pitchers, has been almost a complete failure this year. His work in 1892 was excellent, and when the Bostons secured his release from the Pittsburgs he had made a reputation second to no other

GANZEL, descipation interfere with his work lately mere statement in the absence of a and is not entitled to any of the credit hiteam may have won by capturing the League pennant.

Gastright, the fourth pitcher of the club, is one of the mysteries of the season of 1893. Last year be was a "floater," being giances at the ancient pictures and door in the pictures and door in th about the same was, and when at last the Bostons gave him a trial, while Stivetts and Staley were almost useless, the other deed in desperate straits. But here the unexpected happened. Gastrickt turned up in winning form. He patened in none sic cessive victories and shared Boston entitusiasm with Nichols

Of the catchers Charley Bennett is the winner.

oldest and most widely known. Years ago when he was in his prime and a member of the Detroit club he stood at the head of the catchers of the land. But Bennett belongs to the passing stars. His work for the Bostons this season has not been good. and it is problematical whether he will be a member of next year's team. Bennett is one of the veterans who has outlasted most of his contemporaries by reason of the ex-cellent care he always took of himself. He is the only catcher still playing of 16 who did that service for the National league Charley Ganzel is another veteran, but

having been in service fewer years than Bennett be still has prestige and will remain in a Boston uniform for 1894. He, too, is a man who avoids all forms of dissipation. which largely accounts for his long service on the diamond. Merritt is young and made his reputa

tion during the early part of the season. The Louisvilles had him on their team last year, but didn't think enough of his playing to sign him in the spring. The Bostons gave him a chance, and he rushed to the front in the first month as one of the most successful catchers in the League. He led the Bostons in batting and excelled in his field work. Unfortunately he was injured. in one of the midseason games and laid up for some weeks. Since his recovery he has not done so well. Tucker is considered one of the best first

basemen living and also the noisiest coach er. He never lacks for interest in his club's success, and his recent drunken escapade at Cincinnati while in uniform is deeply regretted by all who like earnest ball playing. Tucker will surely be punished by the League at its annual meeting next month

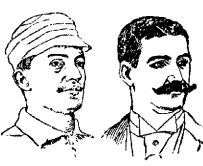

Bobby Lowe was brought from Canada by the Bostons when the Brotherhood rebellion made such havoc among that club's men. He turned out a winning card from the very start and won a host of friends by reason of his modest demeanor and steady habits and good ball playing. Last year he played in the outfield, but when Quinn was released Lowe was placed at second base Though the position was new to him and is one of the hardest to play on the diamond he has filled it most creditably. Herman Long is a Chicagoan and began

his career in the west. He, too, is one of the stars who sprang up during the Brotherhood revolt. He is a peculia**r fielder.** One day he will make the most marvelous stops, and the next his work may be miserable. But Long is what is known as a winner, and his occasional dumps are more than offset by good play at other times.

In Nash the Bostons have the peerless third baseman of the country. No one disoutes the title with him. He may have had his equal when Denny and Sutron were at their best, but in these modern days he stands alone in excellence. Billy is a Virginan and possesses those gentle manly, chivalrous characteristics which have so long distinguished the men of the Old Dominion.

Hugh Duffy ranks as one of the very best out and out batsmen in the country Nearly all the leading heavy hitters of the past have been large men, like Anson, Kelly, Dahrymple, Brouthers, Jones, White, Ewing and O Rourke-men who have in their turn, stood at the head of lists. But

M'CARTHY,

Duffy and Hamilton of Philadelphia have been exceptions to the rule. Both are small in stature, though stockily built, and they rate among the leaders of the League batsmen. Duffy is also an excellent fielder and brilliant base runner.

MERRITT.

McCarthy, like Duffy, is a little man, but a good "sticker,". He is also known as a "tricky player," In this last respect he and Duffy work like a team. They are together in the batting order and aid one another more in making runs, than any other two ball players in active service. Duffy and McCarthy have done more than any other of comple on the Boston team to keep the championship in that city, and for this rea son they are always spoken of in one connection as if they were Siamese twins,

Clifford Carroll is another veteran of the team. In time served on the diamond be outranks all but Bennett and has frement ly been referred to as Grandfather Carroli. He made his best record while a member of the Providence team some years ago. Last year he played in St. Louis, and the year he forche was a member of Anson's team, but be has done better work for the Bostons this season than he did for either of the other two clubs.

Carroll's great weakness has also been his fondness for liquor. That vice pulled him down from his former well earned rep utation as a player. But this year by carefully refraining from even an occasional indulgence he has returned to his old time "form" and given Boston good service.

Such is a brief sketch of the Boston base hall team champions of 1891, 1892 and 1893 It should be interesting at this time to every American who has the slightest interest in the great sport. O. P. CAYLOR.

MILITARY MATTERS. Regimental Changes—The Trip to Congress

Great changes are in store for the Obio National Guard and the Eighth Regiment. It is proposed to divide the guard into two brigades, and when this is done, and it soon will be, the probabilities are that Colonel George R. Gyger, of the Eighth, will be made a brigadier general. This will involve a number of other promotions, and they are likely to be as follows:

Lieutenant Colonel Hard to colonel: ajor F. B Bryan to lieutenant colonel; Captain Harry Frease to major; Lieutenant W. T. Kuhns to captain; termaster sergeant.

The third battalion of the Eighth Regime ", consisting of the two Canton companies, and Company F, of Massillon, left the county seat Saturstruction more complete The wrecking tramp overland, to Congress lake, for day morning at 7:40 for a 13; miles was at once begun, and Massillon won the honors. IT INCREASES WITH NINETEENTH CENTURY CIVILIZATION.

He Shows the Need of Increased Asylumn Capacity in This State-Ignorance is the Morganthales & Heister. Cause and Education the Cure for the Present State of Affairs.

Dr. E. C. Eyman, one of the trustees of the Massillon asylum, is also superintendent of the Cleveland institution, and is one of the ablest alienists in the state. Dr. Eyman is one of those most anxious for the completion of the Massillon asylum, for the reason that the Cleveland buildings are usually overcrowded, and unable to care for hundreds of insane persons confined in county infirmaries.

"We now have accommodations at Cleveland for 900 patients," said he, 'two new cottages having recently been erected At the present time we have 856 patien s, and forty four vacancies. But you must remember that we do not attempt to provide for hundreds ot insane persons, now in county infirmaries, who have every legitimate right to care from the state, and our spare room will soon be taken up by the rapid increase in our insane popu lation. We had an increase of 126 patients between Nov. 15, 1892, and Sept 15, 1893. In these figures I make allowance for all discharged patients, giving you the net increase. "Yes, insanity is on the increase in

this country. I attribute it to advancing civilization, and expect the insane population per thousand to increase as not consider that civilization of itself gives rise to insanity, but I do believe that its external influences—the noise and activities of our rushing life, crowd the weak to the wall and into public institutions To illustrate: Take a member of our illiterate classes, and set him down in North Dakota, tilling Hughes, Canton; Aivin Baughman and the soil, with plenty of light, air, and Emma Schreiner. Harteville: Samuel little to bother him, and he will do well enough. Put that same man in Chicago, in the midst of the hurly burly, and he is at once overwhelmed with the scenes about him. His mind cannot grasp the situation, he becomes giddy, so to speak, and drifts into manta or melancholia, the commonest forms of insanity, and general among the vicious or uneducated. To prove this position, look at the statistics. England has one insane person to every 350 of population. In New York it is one to 450. Here in Ohio it is one o 586, while in South Dakota it is one to 1,000 In 1880, in Ohio, it was one to 680 - now it is one to 586 Thus you see that where we have refinement and civilization in DALTON, C., Oct. 11.—Wm. Graber greatest perfection, there we have was arrested for disturbing a singing most insanity, and so it will be until education becomes more generally diffused, and the minds of the ignorant masses are lifted to a higher plane"

ASYLUM TRUSTEES-

They Do Not Like the Way the Work is Being Done.

Trustees Robert Sherrard, C. E. Evman, and A. B. Richardson, of the Massillon asylum met here today, and spent the morning in an examination of the foundation walls, contracted for by Lomax & Stoyle. Considerable die satisfaction has been expressed by those who have closely inspected this work, and this bad opinion was confirmed by the trustees, who ordered changes here and there, and notified the contractors that they would be reect of each battalion to secure the trip across the fields to view toe deprounds first. On arriving at the lake battalion, including the Akron and the first of the secure the bris.

PURE FOOD BILL.

Before the Ohio Legislature. A bill for the preservation of the public health, and to provide against fraud and adulteration in food, drink and drugs, has been introduced in the legislature at Columbus. This bill is intended to prevent the adulteration of food and drink, and should it become a law, would no doub go a great way toward protecting the public against the manufacturers of alum and ammonia baking powders, who are flooding the state as well as the country generally with their unwholesome product. The leading medical authorities every where condemn the use of alum in bak-

ing powders.
The Chicago Tribune, referring to the question of legislation on alum and mmonia baking powders, says: deals in a direct manner with an evil that must be cut down."

Following is a partial list of the names of the brands sold in this state that have been examined and found to contain either aium or ammonia. Many of the alum and ammonia powders are labeled and advertised as "absolutely

pure," in order to mislead the public:
"Kenton," "Calumet" "Crown,"
"Olimax," "Chicago Yeast," "Grant's Bon Bon," "Hotel," "Snow Drift," "Campbell's," "Cook's Favorite," "Sil ver Star," "Zipp's Crystal."

In addition to the above list there is a multitude of brands sold with a prize. It is eafe to reject all baking powders sold with a prize, as the tests show they are composed largely of wilted. The honeymoon passed in an alum and cost but a few cents a pound. Also refuse any baking powder sold for twenty five cents a pound, or less; it is sure to contain alum.

Surely nothing but their cheapness could induce the public to experiment with these impure powders, at the risk of health. Aside from the question of health or wholesomeness of these condemned powders, and viewed from the standpoint of economy alone, a pure cream of tartar baking powder like "Dr. Price's" from its greater known strength and unquestioned purity will prove more economical to the user in every way.-Ohio State Journal.

The Treasurer's office will be opened between the hours of 8 s. m. and 4 r. m., from the 1st day of October to the 20th day of December, 1893, and from the 1st day of April to the 20th day of June, 1894, for the purpose of receiving the taxes charged on the Tax Duplicate for the year 1893.

The law declares that "cach person" charged with taxes on the Tax Duplicate in the hands of a County treasurer may pay the full amount of such taxes on or before the 20th day of December, or one-half thereof on or before the 20th day of December, and the remaing half thereof on or before the 20th day of June next ensuing; but all road taxes shall be paid

prior to the 20th day of December. The time being limited by law when the Treasurer and Auditor must make their settlement, and the Treasurer pay over the money to the proper authorities, the taxpayers are hereby notified that the Delinquent List will be made up immediately after the 20th of December, and the taxes collected according to the following section of the Revised Statutes: Section 1994. When one-half of the taxes as aforesaid charged against any entry on a Tax Duplicate in the hands of County Treasurer, is not paid before the 20th day of December next after the same has been so charged or when the re-

mainder of such taxes is not paid on or before the 20th day of June next thereafter, the County Treasurer shall proceed to collect the same by distress or otherwise, together WITH THE PENALTY OF FIVE PERCENT. on the amount of taxes so delinquent; and in all cases where such half on any taxes, other than real estate, has not been paid on the 20th of December, the whole amount of taxes, other than on real estate for the current year so charged, shall be due and deliquent, and shall be collected in the manner and with the penalty provided in this Section. When you ask by letter or postal card for the amount of your taxes, designate your property clearly. State in whose name, in what township and Section, and Number of Acres, in what Town, Number of Lot, and in whose Addition. Send

stamp for reply. Send money by certificate of Deposit, Post Office Money Order, Registered Letter or Express. All checks taken at sender's risk

While every effort will be made to accommodate all parties paying taxes, taxpayers are urgently requested to call early and pay their taxes and thus save themselves, as well as the Treasurer, a great deal of time and trouble, and prevent the disagreeable rush at the close of the season.

BILL NYE MENTIONS IT IN THE COURSE | hide a massive tear. OF OTHER REMARKS.

as Justice of the Peace.

[Copyright, 18%, by Edgar W. Nye.]

RUE DE PILASANCE, Sept. 19, 1893. My Drive Henry--It is a good thing that Napoleon Muzzy, or Pole, as we used to call him, came to the fair. He is that much ahead. His bank at Eagle Run, back home, has busted. He has got his round trip ticket bought and paid for and money enough to get back home all right, but the bank will not even allow him to use up a new check

AT THE FAIR. book that he got just before he left there. He says that no bank will ever get him again. He is tolerable hot about it and says that all a bank is for is to take the deposits of honest men and loan them to "men of push and enterprise" that have a good time at other folks' expense and then take paris green, saying, "Adoo, kind friends. I'm going home,

Pole Muzzy says he's about decided to go on a prolonged debauch when he goes home, where it won't cost so much. For 20 years he has sort of yearned for an alcoholic outing, but did not have a real good excuse. Now he feels like "letting the tail go with the hide," as he tersely puts it. You know Pole was always

He's the man that wrote home from the war that he was just going to a tonsorial artist to get his tonsils removed. I've known many ef a man in my life, Henry, but Pole Muzzy rather oversizes. anybody I ever knew in his easy flow of language.

For the word finally, for instance, he always said financially. When I dug my celebrated Hoosick well, he said I would financially get it done, and I did. I got it in the nose-financially. He's the man that rides around in the

set down chairs, as he calls them here at the fair—meaning sedan chairs. Speaking of bank failures reminds me

of Jim Kelby-Black Jim, we called him. He failed in the lumber business in the fifties up on the Nimmycoggin. but in 15 years he had managed to pay up everything but a claim of \$18 due to Lo Bartlett. One day he met Lo on the street and gave him a check for the belle buying stove bolts.

The bank is long since sunk in obliviou having gone into that business about half an hour after Black Jim put his money in there. Running across Lo a little while after, he gave him a check for the amount.

"Why, that won't go," says Lo. "The bank has closed its doors. ! "What!" says Jun, getting a shade or

two darker.

"Why, she's a wreck," says Lo. "No tice on the door says she may go into liquidation, but at present it is deemed activisable, owing to stringency of the panic, to close.

Jim went over to the president's room and knocked sort of gentle as he could, considering that he had a fist that could have knocked down a week's receipts here at the fair if he'd of been that kind of a

"Who's there?" was the statement of a voice inside.

"It's me," says Jim, "Jim Kelley-Black Jim Kelley of the Nimmycoggin-

and I'm in something of a hurry. "Well, we're very busy now, Kelley. Can't you come again this evening:" exclaimed the demonetized but silvery

"That will be too remote; I am very busy myself," said James the brunette. jerking an iron intching post out of the sidewalk and sanding his bands, like the man at the bat. "Now is the accepted time. Will you open the door, or shall I open it?"

The president with the bullion voice opened it, for it was a good door and belonged to him personally. It was not bank assets.

Black Jim turned the key in the door after he came in and began killing flies on the counter with his iron hitching

"What do you want of me?" exclaimed the president, taking a large sight draft out of a tall bottle marked "Mucilage," but smelling more like the matriculating room of a bichloride institute. "What

are you intruding here for?" "I wanted to see you with regards to a certificate of deposit I've got here calling for \$18.

gone. We have taken cash on deposit and loaned on approved security, but we cannot realize at once upon our securities. All we want is confidence." "So you are one of these here confi-

dence men I've heard tell of, are you?" "No, no; not that; not that! Oh, me Gawd, that I should be called a confi-

Havurbs of Chicago, and now feed at a prijing seen the fight, how could I be prejuvate house not far from the grounds. It saves car fare and gives more time to , fine a man like Soiled Murphy, who had see the exhibits, which are out of sight | no money? and no mistake.

I like the specimens of taxidermy best of all. I can stand by a stuffed bear and enjoy it for hours.

Taxidermy originally comes from the two Greek words, taxus, "arrangement," and dermy, meaning to skin. Thus we have skin arrangement, or skin game. where game is thus prepared. I tell you this because a man can go through college and yet miss a few things. I knew a college graduate once that could speak nine languages, but he did not know any better than to go skunking at night in a dress sait.

in this country taxidermy was introluced in 1828 by a man named Scudds, who began the establishment of a museum containing rare upholstered beasts,

Son cames the work of a taxidermist is not successful. I knew an army officery ho used to fill up wild animals with arsenic and autumn leaves, but they kept posting riper and opening up like a boll of cotton, so that the servant had to keep putting back the autumn leaves. The officer also poisoned three private soldiers by keeping his arsenic in solution in a deserted gin bottle.

He stuffed a mountain lion, or puma. once and placed him on exhibition at headquarters. The commanding officer used to shy when he passed by it as a delicate compliment to the taxidermist, but he almost knew it was not a live animal. No one was fooled by it except a man who had been seeing things for over a week in the guardhouse while suffering from alcoholism.

The hon was represented to be in a cronching attitude, and as time went by he seemed to crouch more and more, same as an ice cream elephant does under the steady gaze of the freshair child. He had widely distended jaws and fiery amount, for he had deposited it for that | gums. Farther back one could discover

Spiders spun their webs across the roof of his mouth and from fang to fang, and mice made their nests and reared their young in his abdominal cavity. I never saw anything that seemed to teach me as he did the terrestrial nature of earthly things. Moths gave him a bald spot on the stomach, and one eye came out and gave the other one a keen, searching glance,

That was years before you had taken your place in the great economy of na-

I was a justice of the peace, marrying people ever and anon-people who afterward introduced the half breed into the aristocracy of the west.

A friend who showed a good deal of genius in this matter gave me a stuffed bird which combined the aerial and am-

phibious qualities of this beast. It had the fierce intellect and carmvorous head and beak of the engle and had his tail loaded with lead to keep this massive arrangement from apping him over. He trunk, of the canvasback duck and the

tail of the blue jay, It was great sport to get old hunters to look at it and tell me what kind of a bird it was. I collected in costs \$180, result-"We cannot pay it. Everything is | ing from hand to hand arguments between sportsmen over this bird, and would have collected much more, but the constable could not collect mileage and so disclosed the truth at the end of two

A Good Read For Business.

Rebuked. Dr. Edward Payson, the beloved minister of a church in Portland in the first part of our century, was a preacher who could present the truth intrusted to him

Even in administering a rebuke he was ever tactful and gentle, and one instance of such care is often related of

"What makes you blush so?" said a reckless fellow in the stage to a plain country girl who was receiving the mail bag at the postoffice from the hand of

Dr. Payson, who sat near him and had been until this moment unobserved. gave the girl no time to answer.

"Perhaps," he said gently, "it is because some one spoke rudely to her when the stage was along here the last time." -Youth's Companion.

The Point of View.

A curious illustration of what may be called illogical logic is reported by a gentleman who had to watt a long time at a railroad ticket office for the clerk at the window to get ready to wait on him. "Come, come!" said the would be passenger, growing impatient at last, "Tyebeen here at this window five minutes!"

"That's nothing," said the clerk, "I've been here eight years, and I never found fault about it yet." Exchange,

Answered.

Swell of the Period-Oh! doctor, I have sent for you certainly; still I must had the feet of a sage hen, the torso, or confess I have not the slightest faith in modern medical science.

Doctor-Oh, that doesn't matter in the least. You see, a mule has no faith in the veterinary surgeon, and yet he cures him all the same.-Tagliche Rundschau.

Damage Enough Afready. A friend who has just returned from the World's fan was greatly amused by this placard posted on a sculptured ho on the art department; "Ladies we, please not sit on the heads bull. It is, been broke off two e already."-Bost.

Betriefte Rousseau fluly Thankful For

Moderate Styles-Yet She Goes on to Describe Gowns of Bewildering Splendor. Some New Winter Wraps and Cloaks. (Copyright, 1893, by American Press Associa-

I almost feel like saying, "For what we are about to receive (in the way of fall styles) let us be duly thankful," for now that the season has really opened and we see what we are to wear we find the fashion so much more moderate than we had feared that there is reason for thankfulness. The imported gowns, the most of them direct from Worth, are held up to us as the models from which all others should be copied. And these gowns, though in many instances odd and quaint, are still very pretty and above all stylish.

One gown more curious than beautiful to my taste was of corded wool in a snuff brown, with rush green underweave, which showed in the folds as a changeable effect, and had a plain empire skirt. At the waist line there was a deep, circular band of the cloth, and this was topped by another of the same material, and both were bound stiffly with olive green velvet. Around the waist line and twice around the bust were narrow rolls of the velvet. The gigot sleeves had three stiff-

NEW FALL COSTUMES.

ened caps of the dress goods, each bound with the velvet and starting from under another roll of velvet. This dress was much admired for its daring novelty, and ne doubt will be reproduced in several

Another very handsome imported model gown was of changeable twill, all of wool and in two tones of heliotrope, with just a suspicion of gold and green showing as a delicate bloom as it changed lights by movement. The skirt was a plain empire without gores, moderately full at the bottom. The skirt had a narrow flounce all around under a heading of Persian embrondery, except on the right side, where it was cut higher to form a simulated loop. The corsage was a work of art. The back was cut straight across, without seam, and piped at the bottom. There was a white crape vest in front with Lipping bands of the dress material. These were double berthas. each bordered with Persian work. The sleeves were large gigots confined by gathers in the middle.

Heliotrope, with quite a decided crimson reflection, is often seen among the part and was tailor stitched around the new goods, both in wool and silk, and bottom, and it was lined with changeblackshot wan violet is also shown among able taffeta all through. In front it was But of all the shot silled cut away, leaving a vest of the same, fasand wools that with gold as one of the tened with black velvet buttons. The colors is the handsomest. It is warm high collar and revers were of black veland pleasing. Red and black also make a rich combination.

Vet, and there was a narrow band of the same at the bottom of the skirt.

These goods are now being shown lay- I saw another suit made after this ishly and as rapidly purchased in spite model without any other trimming than of hard times, for women must dress tailor stitching. The velvet trimming and men must weep in this instance. Among the latest importations from abroad there are several novelties in could be of other material, like white tuffed effects. They are woven in such cloth and with flat gold buttons, or it a manner as to resemble velvet, though entirely of wool. They are two toned, and the tufts are of curled mohair in differwith a wise skill and tenderness of feel- ent colors, though these are generally ing calculated to disarm the most preju-, black or very dark on lighter grounds.

There are many new lines of basket weave cheviors with tufted stripes, and these are oft a seen in the most striking combinations of colors, which are toned down by the tufted stripe. All the tufted goods however, are not striped, for I noticed several where the tuits bobbed up in irregular spots. They are aptly but melegantly styled niggerhead tuffs and may resemble a lot of wooly little pates bobing up out of a shallow pond. The cheviots have run riot this season and have overstepped the bounds of their old conservative quietness. We find them now with righ changing truts and all sorts of figures made by tufted mohair, stripes, checks and snowflakes, but it makes no difference how a cheviot is disguised-it is alcould be turned in and worn with a ways solid value. chemisette and tie. It takes nearly 24 yards of goods 54 inches wide to make

There are serges, too, that are disguised under the ubiquitous tuft and the changeable effect. These are all wool and are very durable. Formerly the changeable effect was wrought by silk, but it was found that the wool threads rasped royal purple velvet, lined throughout the silk so that it was not durable. Mohair is as glossy as the silk and stronger. a small round yoke, to which the rest is The coast guard serges are excellent for gathered. There are full hishop sleeves. good solid use and have several new qualities to recommend them this season. They are in all the latest shades. There is a long list of woolens in solid colors, and a quantity of plain diagonal A truly regal garment. The other was wools in two tones and in solid colors. There are some exquisite printed henriettes which have flowers so perfect that one feels like smelling them. The flowers are often seen in cheney silk designs with that same mysterious hazy outline.

There is also another new goods, called Scot's cloth, in dark colors or neutral shades. It is rough, rugged and coarse, but firm, and a costume of this would be very stylish and also useful. It is a species of tweed, and it is said to be rain proof. Crystal poplins are also display ed as noveltoes, and there really scenasto be no limit to the variety, but there not misplaced. Miss Field has thus done always has been and always will be one her sex a service.

THE TRUE INWARDNESS OF GOR-MAN'S TILT WITH WOLCOTT.

Interesting Sketch of the Maryland Sens-Class Politician—Perfect Self Control.

[Special Correspondence.] WASHINGTON, Oct. 5.—Senator Gorman of Maryland is just now the most clans. On a somewhat higher scale 13 conspicuous figure in the senate cham- is still the boss of the machine. But if ber. As the leader of the Democratic any one imagines that this sort of work Bide, which is in the majority in that means, in his case, anything like roysterbody, he is playing a prominent part in the sensational scenes attendant upon the repeal bill contest, which has been one of the most memorable struggles which the senate has witnessed for many years. Inasmuch as Mr. Gorman is a candidate for the presidency, who in the opinion of his friends has a good chance of success, probably there is no more interesting man before the public eye at this time. As is well known, he was once a page in the senate. Twenty-four years now he has been in the senate chamber, half the time as a salaried official and half the remainder as a seuator. He came to the front in the presidential campaign of 1884, when he was the manager of Mr. Cleveland's first campaign. The political gossips of New York and Washington say he is the best campaign manager this country ever saw, though others declare that Mr. Whitney is his superior. It is rather odd that Gorman and Whitney are fast friends and always have been. When President Cleveland and Mr. Gorman quarreled during Mr. Cleveland's first term, the senator and Whitney, who was then secretary of the navy, remained on intimate and confidential terms.

A Wise Caution.

In the Democratic convention at Chicago last year Mr. Gorman wanted to be a candidate. His friends were urging him to permit them to go ahead, and Gorman was almost convinced that he could succeed. But his native caution induced him to ask one more day in which to make up his mind, for he knew full well that if he permitted the use of his name against Cleveland and failed his political career would come to an untimely end, not on account of Mr. Cleveland's resentment, but because a great majority of the leading Democrats of Baltimore and Maryland are stanch supporters of Mr. Cleveland, and they would never forgive Mr. Gorman if in attempting to promote his own ambi-

SENATOR A. P. GORMAN.

tion he were instrumental in securing the defeat of their idol. That night, at an hour when most men are asleep. Gorman and Whitney were closeted to-

"Whitney," said Gorman," tell me, as a friend and as man to man, are you sure to win this fight?"

"As sure," replied Whitney, smiling through his glasses, "as the sun rises tomorrow morning.

Next morning Mr. Gorman positively forbade his friends to use his name in the convention, greatly to the grief of one of his enthusiastic supporters, who had prepared himself with \$600 worth of Gorman badges and was only waiting the word to distribute them through the

As is well known, Mr. Whitney was the real manager of the Democratic campaign last fall. Though behind the scenes all the time, his was the hand that held the throttle. It was Gorman's friendship for Whitney, and nothing else, that induced the Maryland senator to go to New York and take an important part in the campaign. As soon as Gorman appeared upon the scene the betting changed to odds on the Democratic candidate, so great is the confidence of sporting men and politicians in the wisdom and finesse of the senator from Maryland.

Gorman's Correct Habits.

The friendship between Gorman and Whitney, who may be rivals before the Democratic nominating convention of 1896, has been carried from politics to business. Mr. Gorman is now a very wealthy man, and much of his fortune has been acquired during the last few years in ventures which were suggested to him by Mr. Whitney. Gorman's fortune is placed at a million dollars or more, and it is constantly growing. Not only Whitney, but Whitney's alter ego, Dan Lamont, is a great friend of the Maryland senator. Though Gorman and the president are not on the best of terms, the president's secretary of war continues his intimacy with the leader a week Mr. Gorman walks from his home to the Arlington hotel and has a half hour's talk with Lamont before the latter goes to his office at the war department.

Mr. Gorman then walks to the capitol, a distance of about two miles in all. This he does habitually and because he likes it, not because he is unable to afford street car fare. In fact, Mr. Gorman is a good deal of an athlete. Every one who has read the newspapers will re he goes to the play at least once and has is today one of the crack amateur shots to adopt it as a profession. of America. Mr. Gorman can handle a

A SIGNIFICANT WINK. rifle with any of them. He breaks clay THE DRAPERY SWIRL pigeons and glass balls in true Buffalo Bill style, and even does the mirror trick --placing a small mirror before his eyes, with his eyes turned away from the farget, hitting the bullseye as often as the best of them. In addition to the rifle he is handy in the tenpin alley, and at tor's Character-His Ambition and His Saratoga, where he spends his summers Discretion-A Self Made Man and a First as a rule, astonishes the sharps with his

His Moral Courage.

Mr. Gorman used to be known at Baltimore as a leader of the machine politiing, late hours, careless habits or bad company he is very much mistaken. Gorman was never built that way, and the chief complaint the boys used to have against him was that he wouldn't smoke or drink or sit up late nights. If they wanted to see Gorman, they had to see him before 11 o'clock at night. To this day he uses neither tobacco nor spirits, and except on rare occasions, like the one at Chicago, is always in bed before midnight. He is too well balanced a man to be cranky about many things, but this matter of going early to bed is one of his few hobbies. His friends say of him that it would take something like a cataclysm or an earthquake to keep him out of bed later than his regulation hour of midnight, and the cataclysm or earthquake even then would have to be in his immediate neighborhood. For some reason or other, though it is a practice entirely foreign to my own habits, I have a heap of respect for the man who has enough moral courage in these days and particularly in this city to go to bed always at an early hour. A Bit of Byplay.

If Mr. Gorman were not a great politician, he would be or at least might be a great actor. He is a splendid mimic, to begin with, and has a face full of expressiveness and versatility. In the privacy of his own delightful home, where there are always a host of young people, Mr. Gorman is happiest. He oins the games and sports and often recites poetry and gives character sketches go on occcasionally as "extra girls." in a style that would be sure to make a hit on the stage. Mr. Gorman sometimes carries his ability as a natural actor into the senate chamber. There is no man in that body who can assume a feeling of severity or anger and at the same time keep perfectly cool better than the senator from Maryland. We had an instance of this a few days

ago when Mr. Gorman rose to chastise young Senator Wolcott for some remarks which the latter had made reflectling rather unpleasantly upon Gorman. Spectators in the galleries thought Gorman was white with rage. They thought they had never seen a man more possessed by indignation. To them he seemed to be burning with the fire of passion and contempt. But in the press gallery, looking down at the senator com Maryland, were a number of Mr. Gorman's tatimate friends-men who know how next to impossible it is for him to lose his temper or his perfect, much to do with it as anything else. equanimity. During the bitterest passage of his attack on Wolcott, Mr. Gorman caught the eyes of these newspaper Dancing with them is a lifelong occupafriends of his and winked at them in a tion, to which everything else is subormost significant manner, as much as to dinated. Fame because of graceful possay: "Don't you think I am doing this in turing and technically correct steps is good style? Is not this a good imitation dearer than all else in the world to them, of indignation?"

numistakable, not a muscle of his face alike while at work and during vacation relaxed, and the two or three men for in order to retain the necessary supplewhom the sign was intended were the ness of joints and perfect physical cononly ones that caught it or who had the dition. The premiere danseuse has little slightest idea that Mr. Gorman was not time for those outside diversions which feeling every thought which he express are affected by some women who dance, ed with all the carnestness of which man and which form so absorbing a field for is capable. After the somewhat excit-study on the part of young men with ing incident was over Mr. Gorman met more money than brains and those joura friend in the marble room, who con- nalists who believe that to pass one's gratulated him upon the success with time with them is to see life. which he had "skinned" Wolcott and thought to please the senator by saying something unkind of the young Colora- than was carned by either Taglioni or

"Please don't say that," expostulated Gorman. "Ed Wolcott is one of the best fellows in the world. He is a man who would scorn to do a dishonorable

act. I am very fond of him." "Then-then why did you go for him so hard a few minutes ago?" stammered the astonished friend.

"Oh, that was nothing," replied Gorman. "That was a little byplay. Wolcott has been rather too sassy of late. and I love him so well I wanted to teach him caution for his own good."

His Signal Success. From page in the senate to leader of that body is a career possible only in America, and this single fact speaks volumes for Mr. Gorman's ability. He is the acknowledged and undisputed leader in that body, now that the Democrats are in power there, and he has been ever since his signal success as manager of the antiforce bill fight 21 years ago. Ability alone would not push a man to leadership in a body like the senate. He must have many other qualities, among these fidelity to friends, extraordinary fact, unfailing generosity and willingness to spend half his time in

helping others. To people who do not know him well Mr. Gorman appears cold and practical. He is in all his contact with the world, one ever saw him lose his temper or in received by such dancers as Loie Fuller with men of politics and business. No "a state of mind." He has unfailing and perfect self control, but with the men who have gained his confidence he is a delightful companion. To these, of the senate. Three or four mornings and to these only, does he open himself. In the family circle he is always considerate and cordial.

Mr. Gorman is a self educated man. A poor boy, never having had the opportunities of a college education, he is today one of the best read men in the senate. For 25 years his evenings have been passed in his library. His chief recreation, aside from baseball and other athletics when opportunity offers, is the theater. Almost every week of his life member that he used to be a baseball a passion for the stage which under player, but not every one knows that he other circumstances might have led him

WALTER WELLMAN.

IT PLEASES THE TASTE MORE THAN NIMBLE FEET.

Lole Fuller Makes More Money Than a Dozen College Professors-Fortunes In Convoluting Skirts and Lime Lights. The Fortunate Dancers of the Day.

(Special Correspondence.) NEW YORK, Oct. 5.-How many women and girls are there living in the city of New York capable of earning a living

by dancing in public? I have propounded this question to half a dozen persons who ought to be able to answer it accurately, but they do not agree in their responses. Perhaps the most satisfactory reply was from C. B. Cline, business manager of one of the theaters, whose chief attractions are the lithe forms, shapely limbs and twinkling feet of pretty young women. Mr. Cline said that there are probably 200 or 300 here who are competent to act as cory-

LOIE FULLER.

phees in the ballet: that as many more believe themselves to be so competent, and that there are some thousands who The Gerry Law.

"A friend of mine," he went on, "who staged a spectacle awhile ago and advertised for 100 'extras,' declared the day after he had examined those who applied that it was his belief that there are in New York at least 10,000 women who think they can dance well enough to merit pay for appearing on the stage, but then he had been overwhelmed by the number of applicants and doubtless overstated the case."

In European cities they go into the ballet while still children, and in this way they learn a great deal. In New York they are prevented from doing so before they are 16 by the Gerry society, and this is a great drawback which theatrical people hope to be able to do away with before many years. There are many reasons why American girls do not often rise to the rank of premieres. Perhaps the Gerry society's restrictions have as

Women of the Latin races are more often eminent dancers than any others. and so long as a premiere remains upon Though the wink was very plain and the stage she practices hours each day

Premieres earn from \$175 to \$350 a week nowadays. This is more perhaps Fanny Ellsler in the palmiest days of success, and yet there are those who declare with groans that the golden days of dancing have gone forever.

Fuller and Carmencits.

Clara Qualitz, the premiere in the ballet of Versailles, now on nightly at one of the noted variety theaters in this city, is perhaps the best paid premiere in America, but her salary isn't a mark-

er, to adopt the vernacular, to the money and Carmencita. These ladies, I was gravely informed

by Eddie Collyer today, are not dancers anyway. "They are only contortionists," he "They are not legitimate. They

simply infringe on the rights of real dancers. Their performances are nothing but acrobatic outrages." And Eddie Collyer ought to know, for he has been teaching fancy step dancing in New York for many years, and his neatly brushed hair has begun to turn

gray in the service, although his natty figure has lost none of its grace and springiness. But to return to the ladies of the ballet. Seconds get from \$25 to \$35 a week, coryphees from \$8 to \$16 and "extras"

\$1 a night. They must all be of good

form and pleasing features, and all

must know something about dancing The more they know about symmetrical figures being equal the nearer they can

"Of course," said Mr. Cline, the manager I have before alluded to, in talking about the dancing women of his theater, 'we do not assume to especially guard or look into the morals of our young ladies when they are absent from the theater, but we keep a pretty close watch on them here, I can assure you, and so does the management of every house where there are chorus girls or ballet dancers. The girls must 'look pleasant,' to be sure, but they are not allowed to direct their smiles to any particular individual nor to have visitors, male or female, behind the scenes, and if any of them should make herself conspicuous about town we should have to discharge her.

get to the front row.

"Do they save money? Well, not often, you may be sure of that, but there are plenty of them who support their mothers, and their sisters, and their husbands. Dancing girls are often unfortunate in their marriages and get sham dudes for life partners, who are quite willing to have their clothes and food and cigarettes bought with the money that comes from the poses and the nimble feet of their wives.

Process of Selection.

"How are the girls selected? Well, the manager who has advertised for young ladies first surveys the crowd of applicants. Perhaps he wants tall girls. All those whose faces are sufficiently pleasing and are of the required height are told to stand in a row, and the manager passes along in front of them, examining the palms of the hands of each. It has been found that a plump, well shaped hand is an almost intallible indication that the girl possessing it is of good figure. So unerring an exponent, in fact, is a pretty hand of symmetrical limbs and torso that in nine cases in ten no other examination is made."

The favor of the public that loves dancing as a spectacle is fickle. For a long time the reigning premiere was as truly a sovereign in certain circles in New York as was ever a woman who wore a coronet, but of late years women whose claims are based on something startling in the acrobatic line, like Carmencita's poses and stampings, or combinations of colored lights and swirling draperies, like those invented by "La Lore" and imitated by the other serpentine dancers, have been the popular idols.

Not all of these have served the long and severe apprenticeship necessary to pre-eminence in the ballet. Before Miss Fuller discovered, quite accidentally, the possibilities in convolutions of clinging silk stuffs, gracefully guided by skillful hands, assisted by a supple, beautiful torso, she had not given much study to the art of dancing.

What about the moral character of the dancing women. It is as impossible to speak accurately of them en bloc as of any other class of human beings. Some are good, and some are -well, hvely, to say the least. But no one can become proficient in anything even if that enemy of had morals.

J. O. B. ELLIS.

HOW HE GOT THE NEWS. A Reporter's Regard For Chauncey M. De-

pew and its Cause. [Special Correspondence.]

Rochester, Oct. 5. Some newspaper reporters were talking over their experience here the other day when the group was joined by a man who has refired from the work of gathering news and gone into business.

"Thave never been snubbed or turned down," one of the reporters was saying. by a really important man in my life. My rebuffs have invariably been at the hands of the small fry."
"Your experience," chimed in the

m weomer, his that of almost every correspondent and reporter everywhere, at ast in the United States. THE IRRIGATION CONGRESS TO DIS-

CUSS A GIGANTIC MONOPOLY. One Hundred Million Acres of Arid Land

That Can Be Made to Blossom With Fertility-A Place Where Rain Is a Rare [Special Correspondence.] Los Anorles, Sept. 30. -The irriga-

tion congress, which meets Oct. 10, will no doubt be one of the most important conventions that ever met in the southwest. In the west the water question is paramount to the land question, for it is the water that gives to the land its value. The congress will discuss the present systems of land monopoly and water monopoly and submit to congress. their views as to the best means of breaking them up.

The tendency, especially in California, is the aggregating of the land and water in the hands of a few, and it has become so detrimental to the interests of the state that national aid will be invoked by asking such legi-lation that shall form the entire arid land region into bydrographic districts, with subdivisions for each natural basin or drawage districts, with local, state and federal courts to settle the controversies as to water rights, lands, timber, pasturage and mining lands. Such federal courts will also settle the question of the division of the waters of a river flowing into two or more states. The value of the lands in these respective states depends upon irrigation, hence it becomes a national matter.

The Water Monopoly.

It is estimated that there are 100,000. 900 acres of arid lands in the west. A large proportion of this is government land. The water sharks have located the springs and streams. The government lands are deprived of their proportionate amount of water, and thus become practically valueless. Consequentlythere is no demand for government lands in those and districts from actual settlers. Under the present laws of congress relative to arid lands a man can acquire a section of desert land for a nominal price provided he will irrigate it. He can also acquire land, under the homestead, pre-emption and timber cul-

AN IRRIGATION FARM.

ture acts, thus getting about two square miles of land. The man could then sell his two square miles of land to his neighbor, who had located an equal amount anything be dancing without continuous of land and the streams that run through persistent work. And hard work is the it, and thus become a land monopolist and a water monopolist. People who I buy land of him do not get any right to the water. His title is perpetual, and they must pay for the water they use. just as a cury water company charges

As there is more land in this arid region than can be progated by the notand streams the chief value hes not in the land, but in the water, and the set thement of this problem is what will now confront congress. If a mangers control of the water, he practically owns the land through which that water runs, and he can increase or decrease its value. He can turn the course of a stream so that his land will get all of the benefit of it, and the government land below him will remain "high and

An Americal System.

A company of promoters can locate upon adjoining lands, turn a small river tion its natural channel, and their ranches become valuable. Those who locate near them may not bring the stream back to its natural channel for these speculators have "located" the stream and laye thus acquired a per-In the early settlement of this country the Spanish land grants in the irrigable

districts were beneficial in that they af forded the farming of large tracts. But as the country became more thickly settled the people adopted the trrigating system of old Spain, which has been in use in that country since their industrial history began. They first organized pueblos, or towns, and the settlement or district naturally tributary to the pueblo was organized into an irrigation municipality. Each pobladore had his separate lands, but the water belonged o the municipality. The community constructed their ditches, elected their officers, made the own laws. The ownership was perpetual in the municipality, thus placing it beyond the power of individual monopolists and sharks.

Under the Spanish laws a new pueblo could not be founded within five leagues of an existing pueblo, so that there was plenty of room for the pueblos and their irrigation municipalities, and water inonopoly did not exist. No man nor community could acquire the ownership of an entire river.

Schemes For Relief.

The Pueblo Indians of New Mexico have the same system and have had from the highest antiquity. In California, especially in southern California, there are numerous culonies who have adopted the same plan, and the tendency of the people of this state and of the west is to divest the land and water monopolists of their power, and to this end the irrigating congress will propose various schemes for relief to the state and national legislatures.

The east and south thickly wooded blessed with many natural streams and copious winter rains, little realize the value of water to the west, which has only two rivers of any considerable size and where rain is a rare luxury.

It can no longer be howled by Neal and Taylor that Governor McKinley has paid no attention to State matters He has spoken. It was Mr. Neal him self who laid down the gage of battle and selected his own weapons and his office in January, 1892, I found the office own ground. That he has seen fit to of State Inspector of Workshops and change them all is the most significant Factories filled by Mr. W. Z. McDonald. feature of his campaign. Governor of his administration stand for itself without verbal defense on his part, and so it stood until Mr. Neal attacked it. He will find the Governor ready for any discussion that may be undertaken.

once instituted an investigation and it covered every period of which the State was capable of turnishing any proof And a part of the misappropriation ascertained by the commission occurred during the administration of Governor Campbell and a part of it suring the present administration. All I could do was to ascertana investigation, appointing three honorthe accounting. representing

able gentlemen to conduct it. The commission consisted of the State Treasurer, Auditor and Attorney-Genauditing and legal departments of the State. My instructions to them by letter were to make the most searching investigation and to spare no one. The investigation was had, and the result was that the thief hispector was found guilty and the amount of the deficiency was ascertained to be about \$4,600, which was covered into the State Treasnry by hum Upon the finding of that commission

I felt it my duty to dismiss the officer the Democratic party has only been in for corruption, and so did it more I could have done I do not know Mr. Neal complains that he has not been indicted Mr McDonald is now a citizen of Franklin County, hving in Columbus, within the jurisdiction of the grand jury of that county, which, by the way, is a Democratic county. whose Prosecuting Attorney is a Democrat, and who can proceed now or at any time in the future, or who could have proceeded at any time in the past. if the grand jury had been in session. to find an indictinent, if one lies, which Mr. Neal complains has not been done.

It may be proper for me to say that the Prosecuting Attorney of Franklin County has been furnished with all the testimony taken before this commission. together with its findings, and is in pos session of all the facts known to the State administration, with power to act as may seem best and right and just in the interest of the people and in the faithful discharge of his public dutie . Nobody can regret this unfortunate affair more than myself. Now, as to Mr. Neal's accusation

against the administration of the Da ton Insane Asylum. It came to my knowledge that two of the attendant had been inhuman in their treatment of patients at least it was so charged. at once called the Board of Trustees together to institute an investigation. The attenda is were removed and they have since been indicted by the grand jury of Montgomery County, in which jurisdiction they reside.

It is probable that Mr. Neal does not know that the two attendants thus gravely accused were appointed by the Board of Trustees under the administration of Governor Campbell. Our board found them there, and believing them to be faithful attendants, and desiring that the institution should have tried and experienced help, retained them, but the very instant that they discovered their inhumanity at once dismissed them from the employment of the institution.

Could any hing more have been done? Mr. Neal will probably not regard the fact that these attendants were appointed under Governor Campbell's administration as a good defense for the Republican board, for it is generally understood that he thinks as little of Governor Campbells administration as he

thinks of mine. Again, he says, there have been some

Pat, who met ed, and to that end I instituted an him at the depot, "How are things at home?" To which Pat replied. "Why, things are much better than when you

an Irishman, as will be seen, that he employer had been absent from the city for a short time, and upon his rewent away, as you recollect you went away early in the spring." The employer said: "I don't exactly under stand. Pat." I will explain to you," said Pat. "You know that the Repubhean party has been for lo these many years reducing the nours of labor down to eight hours per day. Yes, you might say it has been fully 25 years at it just think how long they were doing it and it was only vesterday that I was reading in the paper and you know that power six months, and it was in the paper I was reading that there are very few mills down East, or anywhere dse now, where the men work over five hours a day. Now I will just ask you il this is not accomplishing more in six months than the Republican party did in 20 vents.

Speaking of the position of the soldier on the pension question, at the National G. A. R. Encompment at Inhanapolis, President Harrison said: He will not ask that any who have fraudulently obtained a place on the pension roll shall remain there. He will ask that that other familiar maxim of the law, that fraud is to Le proved, and not presumed, shall be applied to the soldier."

They have a Confederate war journal in Washington now. The object of this periodical is to glorify the men who fought to destroy the Union and to keep before the rising generation the sacrifices and heroic struggles of "beloved Southland" for slavery and a cotton empir- . Grover Cleveland, Hoke Smith and commissioner Lochren are allevidently mong its constant readers. Hoke Smith's concession to the old

pensioners was only intended to placate the (i. A k in National convention assembled. He is going right on sucpending the pensioners in defiance of law and justice. He is the typical rebel bushwacker in this matter, just as his friends were during the Rebellion. A vote for Neal for Governor is a vote of endorsement of him and his methods.

The work of discontinuing pensions to disabled Union soldiers is to go on as long as Hoke Smith is Secretary of the Interior, or until all the pensions are stopped. Twenty-four clerks are engaged at the Pension Office in this work alone, not to speak of the rejection of pensions.

The products of American soil should be nanufactured in America by American machinery and American workmen. This is McKinley's platform. Why shouldn't It be every true American's. Why should you not endorse it by your votal.

NEWSPAPERARCHIVE®

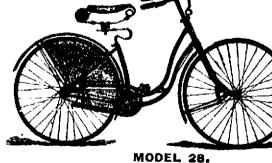

Would You Own a Bicycle?

If you cannot afford the latest and most improved article in wheels, and still want a bicycle of high grade, a machine to be proud of, a machine that is the equal in construction and finish of any bicycle in the world, and superior in every way to the 1893 patterns of most builders, we will make you a proposition. We have about 200 of our

1892 COLUMBIAS,

model 27 for men, and model 28 for ladies, which we want to sell. They are grand wheels, we never made better ones for wear or for work. Thousands and thousands of them are used to-day by delighted riders who paid \$150 for them a year ago, and got full value for every cent of it. We have sold hundreds of them this year for cash at the price at which they are listed, although in pushing our 1893 wheels into publicity we have neglected to advertise them. Now it is getting late in the season and we want to close them out. To approved parties who cannot pay cash, we will sell the balance on easy terms of payment. You may have them on the instalment plan, at a very slight advance from the listed price. Here are the wheels:

MODEL 27. BEAUTIES, AREN'T THEY?

You can have them with cushion tires at \$110 each, or with pneumatic tires at \$115 and \$125 each, cash, according to the quality of the tires.

The tire on the \$125 machine is our best Columbia pneumatic, the best and most expensive tire to manufacture ever used on a bicycle, fully guaranteed against puncture for the year; moreover, we guarantee the whole machine from rim to hub, from handle bar to pedal.

HOW TO GET ONE.

Go to our nearest agent. If you don't know who or where he is, write to us and we will tell you, satisfy him of your honorable intentions and ability to pay, pay \$25 in cash and arrange to pay the balance within one year. This is an easy way to possess a bicycle worth two or three of the fourth grade machines which are hawked about in auction rooms. If you wish to take advantage of this offer you should attend to the matter at once, as we have but a few of them.

You are welcome to our catalogue, it is a beautiful little book, beautifully illustrated. Call on our agents for free copy, or send us two-cent stamps for postage and we will mail it.
